

All the diamond products are manufactured by Microdiamant AG – world leading producer of synthetic diamond.

Exactness of grain sizes (Highest calibration) provide the best quality of polished surface and repeatability of results.

Two in One water based diamond suspensions

Monocrystalline diamond suspension Magnum-Top-Dou and polycrystalline diamond suspension Poly-Top-Duo are your diamond suspensions for routine work. High calibrated diamonds provide consistency of results. Low viscosity allow quick spreading of suspension drops on polishing pads.

Available in 250 ml, 500 ml, 1 Liter, 2,5 Liter bottles and 10 Liter cans.
Application manually as well as through automatic dising systems.
Two In One Diamonds suspensions are water based no smell, dye-free, health an environment friendly.
Ready for use, just apply on polishing pad without lubricant.

It is one of our mean Targets to protect your Health and environment.
All the diamond suspension / pastes do not contain any benzene and other organic solvents.
